STUDIO VELOX

What the monthly covers

The monthly is the part that matters. It is what stops a website going stale, breaking, or sending enquiries nowhere. **Each tier includes everything in the one before it.**

$47 / month

LOOKED AFTER

- Hosting, your domain connected, and the security certificate
- Small changes — prices, hours, photos, wording
- Anything that breaks, fixed
- Daily backups and uptime monitoring
- Security and software updates
- Changes live within three working days

> This is the tier that stops your website quietly rotting. Websites don't sit still: the software behind them needs updating, certificates expire, and the thing that worked last year stops working. For $47 a month that is my problem instead of yours. If your prices change or you want a different photo on the front, you text me and it is done within three working days. If something breaks, you don't need to be the one who notices — I am watching it.

$97 / month

EVERYTHING IN $47, PLUS

- Email on your own name — *adam@yourbusiness.com.au, arriving in the inbox you already use*
- A health check every month, emailed to you
- Who visited and where they came from, in plain English
- Changes live the same day
- Your Google listing kept current

> Everything above, and now you stop looking like a hobby. An email address at your own business name does more for how seriously people take you than almost anything else, and it arrives in the same inbox you already check — nothing new to learn. Once a month you get a short email: is the site still quick, is anything broken, how many people came and where from. Not a dashboard you have to work out, just a few sentences. And changes go live the same day instead of within three.

$147 / month

EVERYTHING IN $97, PLUS

- Your assistant, answering customers at eleven at night
- **What your customers actually asked** — *the questions nobody rings up to ask, sent to you monthly*
- One new page a year, included
- A seasonal refresh twice a year — *new headline, new offer, new photos on the front*

> Everything above, and now the site works while you are not. The assistant sits on your page and answers the things people will not ring up to ask: what do you charge, do you come out to my suburb, are you open Sunday. It only ever says what you have told it — it cannot invent an answer or make a promise you would have to keep. Then each month I send you the list of what people actually asked, which is usually the most useful thing you will read all month, because it tells you what your customers are unsure about in their own words.

STUDIO VELOX

The build, and the fine print

The monthly looks after the site. The build is the one-off cost of making it in the first place. You see the finished site before you pay for it.

BUILDING IT

BUILD	WHAT IT IS	THEN	FREE LOOK
$0	**One-page site.** One scrolling page with everything on it — who you are, what you do, how to book you. One round of changes before it goes live.	$47/mo	14 days
$497	**Five-page website.** Home, About, Services, Gallery, Contact. Your brand colours and fonts, email on your own domain, contact form, basic on-page SEO, Google listing connected. Three rounds of changes.	$97/mo	7 days
$997	**Five pages + assistant.** Everything above, plus a text assistant trained on your prices, services and hours. It hands anything it does not know straight to you with your number.	$147/mo	7 days

No deposit. Nothing is charged until the free look ends, and you get a reminder first. There is no minimum term and no exit fee — stop whenever you like and the site stays yours.

PAYING YEARLY

Twelve months for the price of ten, on any tier: $470 instead of $564, $970 instead of $1,164, or $1,470 instead of $1,764. The build cost is the same either way.

NOT INCLUDED AT ANY TIER

- ☐ Redesigns and rebuilds
- ☐ New pages beyond what your plan includes
- ☐ Advertising and SEO campaigns
- ☐ Writing your copy from scratch, or supplying photography
- ☐ Third-party costs — domain registration, booking platforms

Your domain is registered in your name and paid to the registrar, not to me — usually $20 to $40 a year. You own it, and you own the site.

Bigger jobs

Extra pages, an online shop, a booking system, an ad campaign. Nothing is off the table. Tell me what you are after and I will give you **one number for the whole job, agreed before I start**. It does not move, and there is no meter running while I work.
